SWRPC GIS Data Base

A topographic map of the West Kintla area. The map shows a proposed road alignment (indicated by a thick black line) passing through a landscape with various land use designations. These include green hatched areas, blue areas, and white areas. The map also shows contour lines and a network of roads. The label 'West Kintla' is visible in the lower right corner.

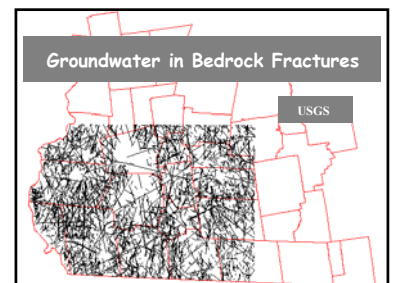

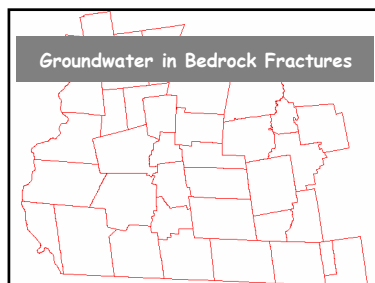

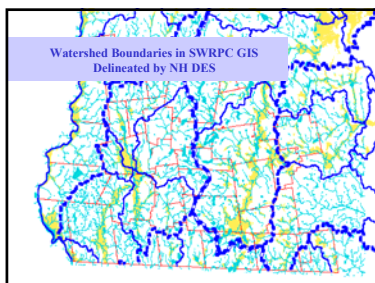

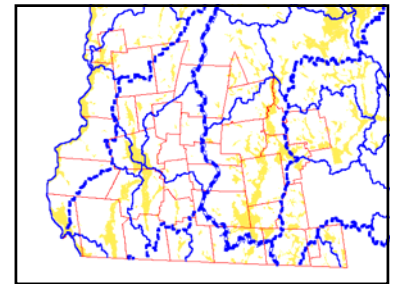

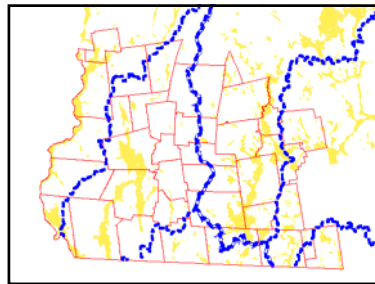

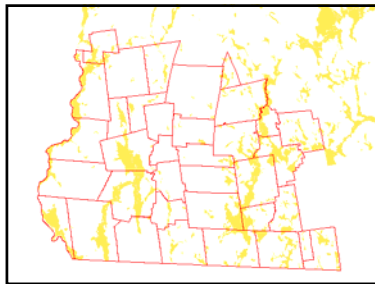

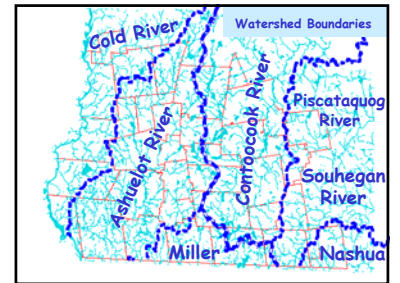

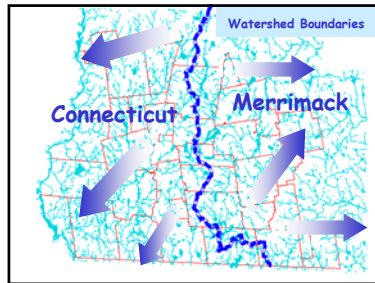

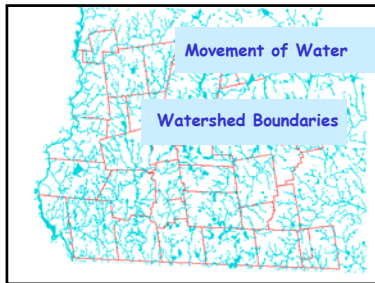

Regionally Significant Resources

- Water Resources**
 - Surface Water & Wetlands
 - Stratified Drift Aquifers
- Productive Agricultural and Forestry Soils
- Sensitive Habitats
- Unfragmented Lands

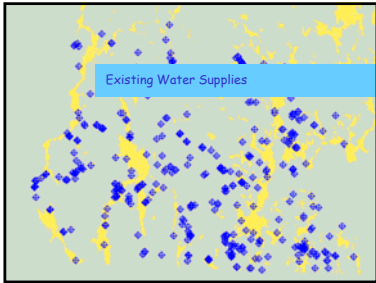

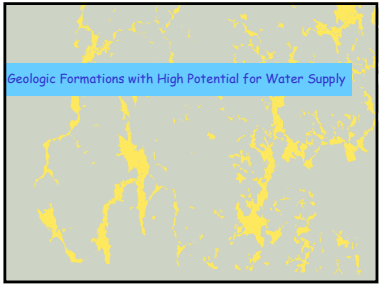

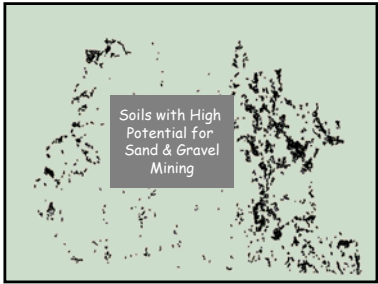

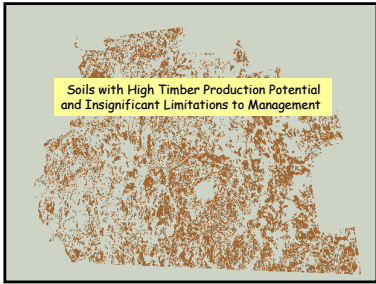

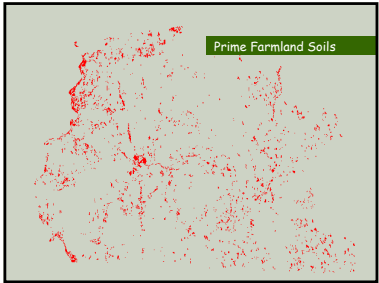

Regionally Significant Resources

- Water Resources
 - Surface Water & Wetlands
 - Stratified Drift Aquifers
- Productive Agricultural and Forestry Soils**
- Sensitive Habitats
- Unfragmented Lands

Resource Extraction Potential

- Agriculture
- Timber Harvest
- Sand & Gravel
- Water Supply

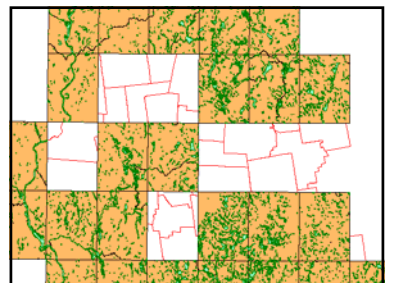

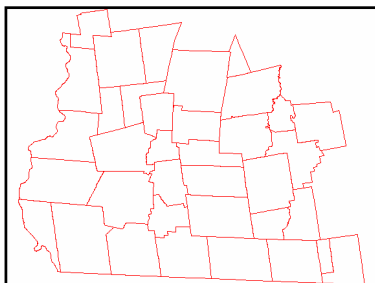

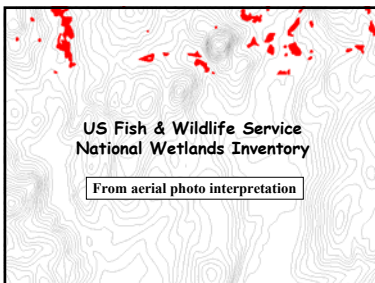

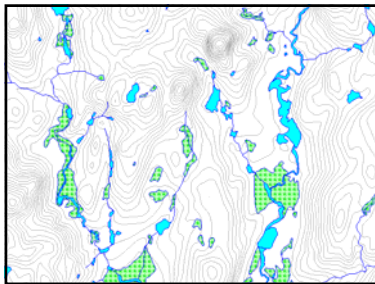

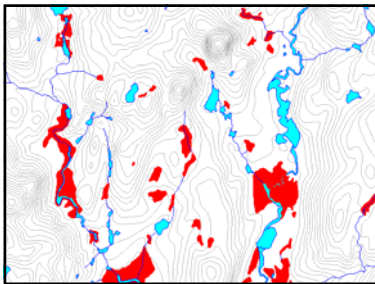

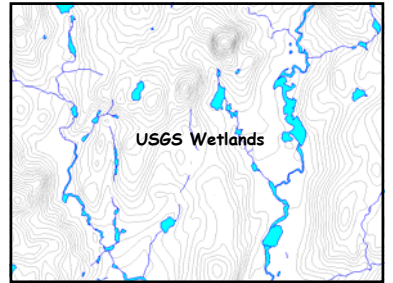

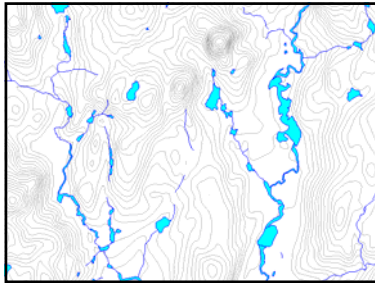

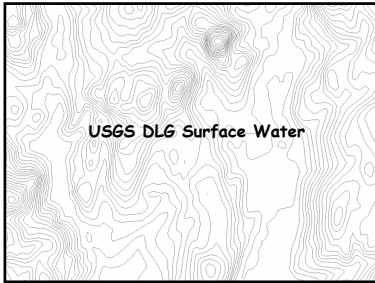

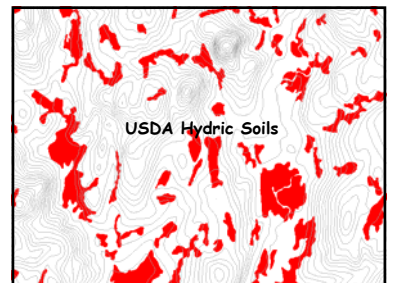

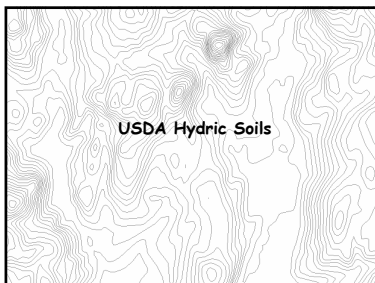

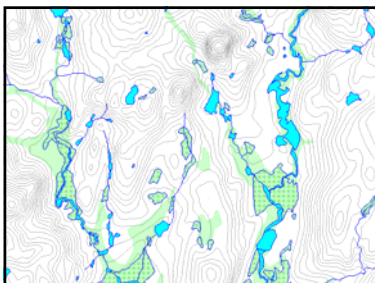

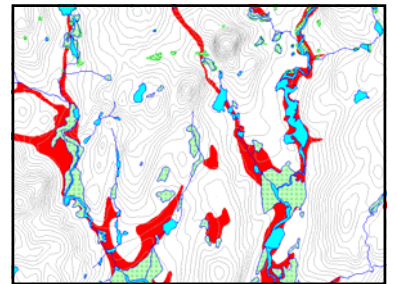

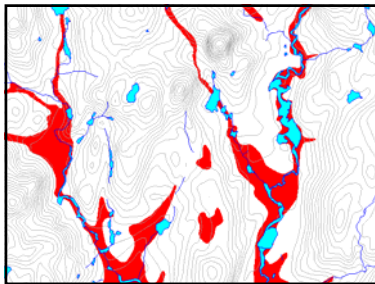

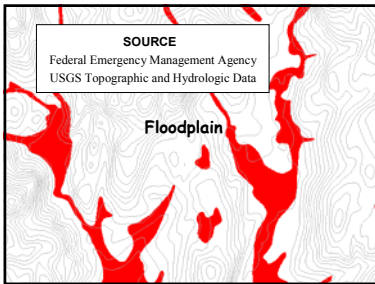

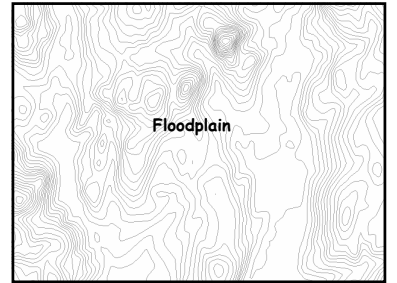

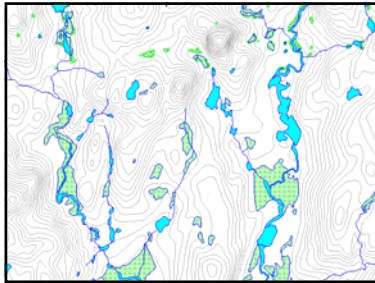

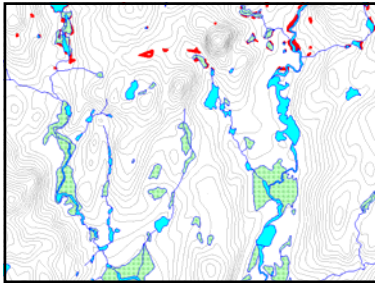

Regionally Significant Resources

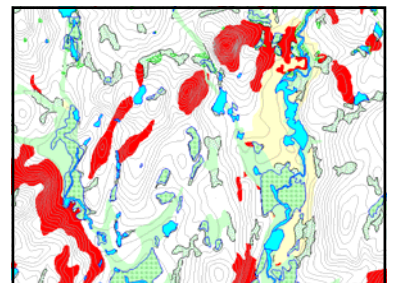

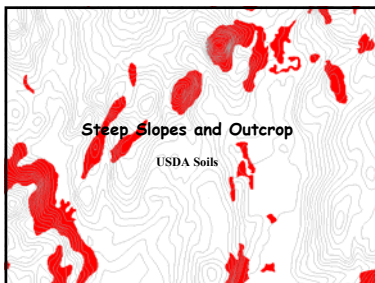

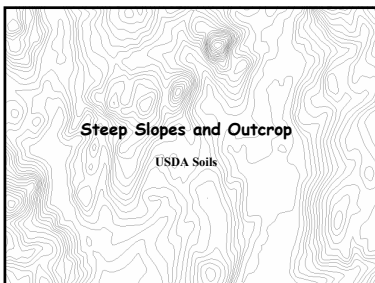

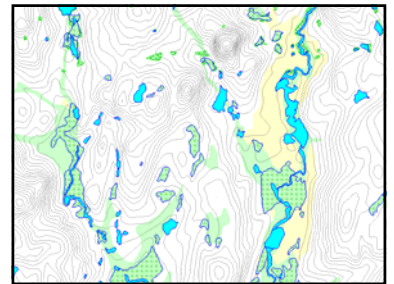

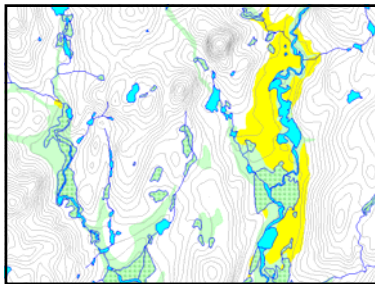

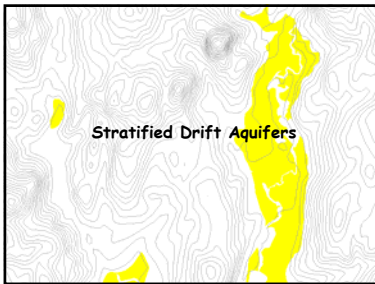

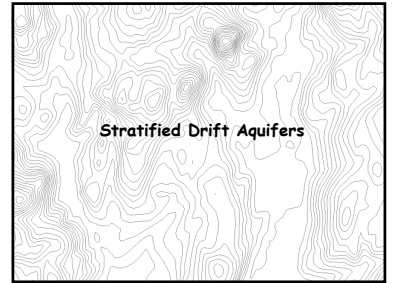

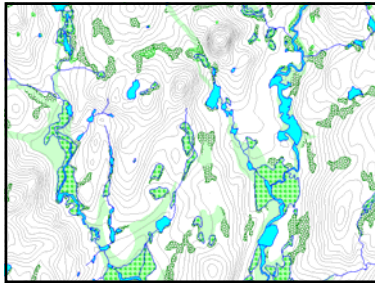

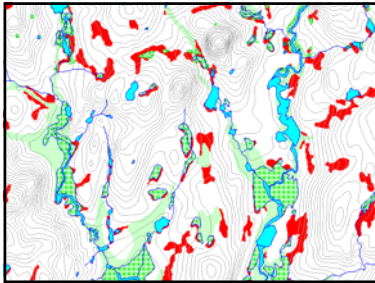

- Water Resources
 - Surface Water & Wetlands
 - Stratified Drift Aquifers
- Productive Agricultural and Forestry Soils
- Sensitive Habitats**
- Unfragmented Lands

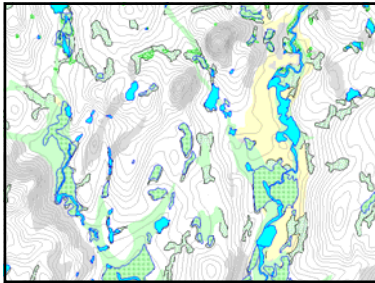

Sensitive Resource Areas

- Fragile Communities or otherwise host
- Special Plant and Animal Communities/Habitats
- Isolated
- Small Patches
- Ephemeral Component (seasonal or episodic)
- Aquatic/Terrestrial Interface

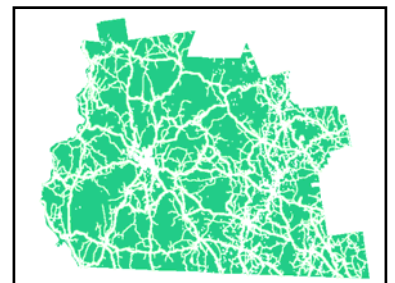

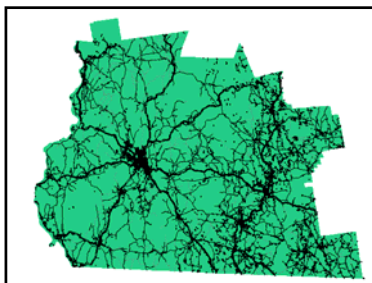

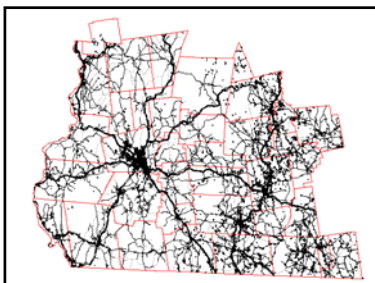

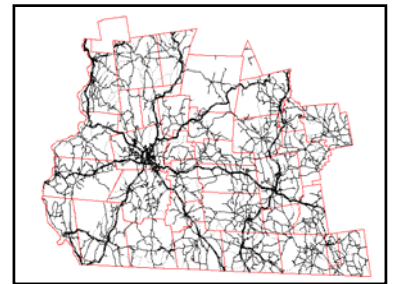

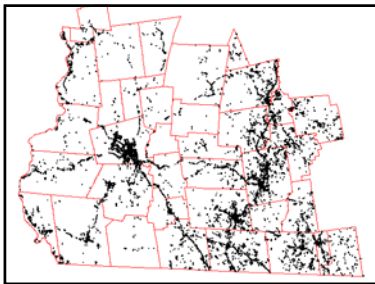

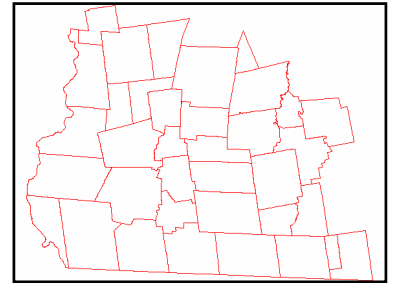

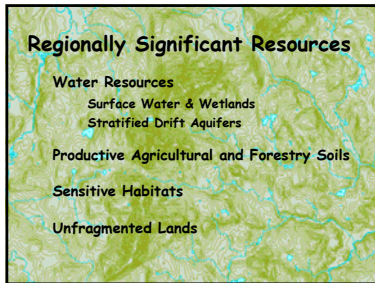

Regionally Significant Resources

- Water Resources
 - Surface Water & Wetlands
 - Stratified Drift Aquifers
- Productive Agricultural and Forestry Soils
- Sensitive Habitats
- Unfragmented Lands
